
Harlequin's pipe by Quique Marduk & Juan Pablo Ibanez

Harlequin cigarette holder is a really nice cigarette effect that can be used in a cigarette routine as impromptu or like a magic gag. It was popularized by the great Cardini in his act.

Now, Juan Pablo has added an unexpected ending. The pipe!

Very easy to do, complete with all the necessary props and gimmicks.

You don't need to smoke nor lit the cigarette.

A black cigarette holder appears. The performer reaches in the air and catches a cigarette, it is pushed into the ear and appears in the holder!

Now the cigarette is removed from holder and vanishes.

The cigarette appears in the holder again and the magician produces a lighter, and when you will light the cigarette, the holder transforms into a pipe!

Great comedy act, perfect for comedians, magicians or clowns.
