
Volition blue chip by Joel Dickinson

THINK YOU HAVE FREE WILL? THINK AGAIN!

New & improved design poker chips with a brand new force method!

Volition Blue Chip 2.0 can pack a punch in a minute or it's a hard hitting, five minute routine guaranteed to amaze your audience.

"Taking the original Volition to a new level."

- **Dean Williamson**, Mentalist.

Inside a closed black bag, sit three poker chips and your participant attempts to decipher the color of the poker chips inside. Once the chips are removed your participant and spectators are astonished that they are correct.

The magician explains that each poker chip has a location, so the participant decides which poker chip will go where (every choice is your participants). Astoundingly your participants actions were predicted ahead of time, printed on the other side of the poker chips!

To top it off, the poker chips contain a hidden prediction which brings **Volition Blue Chip 2.0** full circle, proving everybody can be manipulated!

Volition Blue Chip 2.0 is a close up master-piece that fits in just one pocket.

No unusual procedures

New poker chip design
