
666 V4 (Cyan) by Riffle Shuffle - Pokerdeck

From the abyss of the underworld, a shine shimmers in the darkness. The devil invites you to his latest COLD FOIL collection.

The popular run of the 666 series was a gift from the devil. Three years ago, the 666 Cobalt Blue and Crimson Flare sparked what was one of the most popular catalogs. What followed was the Emerald Hellfire and Purple Inferno, each with a different twist to showcase the different designs that could appeal to collectors. And last year, we introduced the COLD FOIL 666 Greedy Gold and Skeletal Silver to take this series to the next level. Allow us to introduce you to the **666 V4 Rose Gold & Frostbite Playing Cards!**
