# TORNADO by Peter Eggink

## Smoke in a Glass Reinvented

Perform the classic "Smoke to Glass" as never before -for the first time ever it's super visual, super easy and super practical to perform. **Tornado** is the closest thing to real magic.

After your favorite card magic you take a glass (may be borrowed) and place it upside down on your deck of cards. You light a match and with a snap of your fingers the flame of the match is magically "blown" out -you catch some of the smoke and blow it towards the glass... visually and magically mystic smoke starts to materialize out of nowhere, filling the whole glass in just seconds with thick, white smoke. This looks simply astonishing.

**Tornado** is not limited to the smoke to glass effect but is designed to elevate your everyday card magic in "stealth mode". Cleverly designed and hidden in plain sight inside a just 6mm thin gimmick, made to blend in with your own deck of bicycle cards.

Make cards magically appear under the glass, use it to level up your color changes or add that extra dimension of mystique to your favorite Haunted deck.

**Tornado's** original, unique smoke system has taken 4 years in R&D by our own creative developer: Arman Abir. Inside the box is the **Tornado** gimmick, Red and Blue Bicycle card gimmick, micro USB charging cable, remote control, smoke fluid and online instructions.
