
DOUBLE VANISHING DECKS by Juan Pablo & Quique Marduk

Double Vanishing Decks created by Juan Pablo and Quique Marduk

Imagine you have a case with two decks of playing cards, one red and blue.

Take out the red deck and perform any trick with it.

Place the deck into the case again and announce that it will vanish.

Immediately, open the case and the red deck is no more there!, and reappears into your jacket pocket .

Take the blue deck out of the case and explain that you will repeat the experience with this deck.

Place the deck into the case again clearly and after a magical gesture, open the case and the blue deck disappears too, and magically, it appears into your pocket again.

It is an excellent effect to finish a card routine, great for restaurant magic, super easy to do, reset in a few seconds.

On the explanation video included in English and Spanish, you will find several routines and ideas to perform, even with different objects, such as ropes, cigarettes, bills, silks, etc.

The case is specially made in strong plastic.

You can use your own regular Bicycle decks.
