Oreality by Michael Murray - Buch

Oreality is a limited soft release booklet containing a brand new playing card divination system that will work in ANY language.

Whilst this book undoubtedly received very high praise from the community, there was one drawback, in that this system was designed for an English speaking audience. After countless requests to translate this system, Michael went back to the drawing board and began the process of creating a revolutionary new system that would work in any language.

We are now, super proud to announce that this system is complete. Early demonstrations at the Blackpool convention produced jaw-dropping reactions from those who were fortunate enough to witness it.

Imagine being able to detail the exact thoughts that exist in your participants mind at the exact moment that they think them...

After generating a random playing card in their mind, the performer is incredibly able to discern its exact suit and value in the most direct way imaginable. There are no mathematical procedures or longwinded processes and even better still, you can describe the exact thoughts that exist in the mind of your participant the moment that they create them in their mind.

If you were ever interested in the Isolation project, but the language restriction put you off, then this is the project for you!

Note: As a special bonus, this 34 page booklet comes complete with bonus props which allow you to perform an Uber clean thought of card to wallet effect!
