## Graphic Design CheatSheet V3 - Pokerdeck

Our goal is to create functional design tools for anyone who is into graphic design or just design in general! We are still in the early stages of our journey; so we need your support to help us realize this project as another steppingstone to give us the foundation to expand our brand further. Honestly, we think this might just be our favourite project yet! Have a read below to find out more about our latest deck, we hope you like it as much as we do :)

If you are one of our previous backers or are following us on instagram, you would be aware that our original design was ready to go (had the physical mock ups made, marketing photos taken and even campaign video was ready to go). Long story short, we wanted to maintain our positive brand image and did not want to risk any legal implications down the track, so we decided to change the design direction and instead ended up with something we believe is even better! This updated design is jam packed with functional elements that incorporates custom-designed fonts, logo design references, poster layout references - all wrapped up into a clean back design. Come check it out!
