
BOOMERANG CARDS ACROSS (3 PACK) by Chazpro

Effect: The performer shows two printed ribbon spreads of cards, a long one and a short one. A spectator selects either spread (for example, the short one). One or more people mentally choose cards from that spread. Free choice.

Without asking a single question, the performer makes the selections travel to the long spread! **Boomerang Cards Across** is an impossible transposition of one or more printed cards! This baffling, yet easy to perform trick, takes the popular Boomerang optical illusion to a new level! Easy to do, yet a real fooler!
