
HEADS & TAILS PREDICTION by Mickael Chatelain

Do the test at home!

Take a simple coin, any coin of any currency.

What do you think, HEAD or TAILS?

Throw the coin in the air... let it fall on a table for example.

Did you get it right? Heads or tails?

Was it luck, intuition or influence?

Did you influence chance?

Can you guess EVERY TIME which side will fall?

Mickael proposes you today a DIABOLICAL method ! A method that will fool your spectators every time ! A method so INCREDIBLE, that even professional magicians will be taken in!

Read the description below and tell yourself that you will be able to do it in only a few minutes!

Effect:

Ask a spectator to take out of his pocket 3 coins, 3 different coins, if possible, and put them on the table.

Take out 3 small pieces of paper from your wallet, and place them on the table as well.

The 3 papers are numbered from 1 to 3 on the back.

Tell your audience that this is an experiment to see if your hunch is right or not!

Explain that you'll check it at the end.

Now invite your spectator to take one of the three coins. Ask him to throw it in the air above the table.

The spectator does it... the coin spins in the air to fall back into the middle of the table...

Ask your spectator to tell you which side is up?

TAILS, he says.

Now ask him to move the coin to one of the 3 papers, number 1, 2 or 3! (no forcing).

Paper #2? Ok!

The tails side up coin is now placed in front of paper #2!

Now invite the spectator to do the same with a second coin... The coin spins in the air and falls back on the table to finally stop heads up this time!

As before, the spectator advances the coin to one of the two remaining papers... the #1 or the #3

The #3 paper? Perfect!

The heads up coin is then placed in front of the #3 paper!

Finally, the last coin is thrown in the air and lands heads up as well!

As for the 2 previous coins, it is simply places in front of the last remaining paper, namely the #1!

Could you have known everything in advance?

Slowly, pick up and turn over paper number 1 with your fingertips and show it to your viewer!

On the back of it, in big black letters, is written HEADS!

INCREDIBLE! The coin in front of paper number 1 is on the HEADS side!

Continue with paper number 2!

The coin in front of paper number 2, is tails up!

Turn over paper number 2 with your fingertips and show it too!

Here again you are right, because in black it says tails!

How could you know in advance?

Now show the last coin, the one in front of paper number 3.

Here again, slowly turn the paper over and show what you had written in advance!

In big black letters is written HEADS! The coin, of course, is heads up.

A perfect match! A mystery, a miracle!

The spectator flips the coins himself and then decides on their final location! And yet you knew everything in advance!

Always in your wallet! No preparation! A mentalism effect that can be presented anywhere, with any coins.

Highlights:

- A real miracle!
- The method is DIABOLIC!
- No error, 100% reliable
- No forcing or other !
- No manipulation, IMMEDIATE reset!
- So clean, really INCREDIBLE!
- No change... 3 coins and 3 papers, nothing else!
- You slowly turn over each paper, no suspicious gestures etc!

The only trick you will ever have in your wallet that requires nothing more than 3 regular coins!
