## **FOCUZ by Peter Eggink**

Any card is selected and is initialized on its back by the spectator. The card is shuffled back into the deck. Next, a blank-faced card with a hole in its center is shown and placed on top of the deck - the top card can be clearly seen at an times through the hole with just a flick the spectator's selection magically appears on top of the deck showing their initials right through the hole!

Without any switches, the card is given back to the spectator as souvenir. This is a super visual close-up illusion that will fool you - A magical "flash appearance" of a signed card like no other due to Peter's clever gimmick design.

**Focuz** comes complete with a ready to go, hand build gimmick on Bicycle stock and online instructions.
