
INTUITIVE CARD PREDICTION by Astor

The **Intuitive Card Prediction** is a powerful and very direct mental effect. Can be performed on stage, In parlor conditions. in close up conditions or doing table hopping as well.

A prediction is written either before the performance or in front of the audience and placed in the trousers or jacket decoration pocket without revealing it. Then one or more spectators freely determine and name one card. The named card is lost in a deck or it is placed into a glass. Finally the revealed prediction perfectly matches with the named card.

There are four different presentation methods explained in the video explanation included.

Only one complete deck of 54 cards including the two Jokers and only one prediction card is used in the routine.

No force! No pre-show! No stooge! No equivoque!
