## CCS RED SV by N2G

This is special version for CCS, it has one face shell, one back shell and 4 coins.

In coin magic, the use of ancient Chinese coins are oriental, traditional and elegant.

After the N-series coin props became popular all over the world, I'm so honored to release a new CCS product, a high-quality coin shell set with Chinese charm.

The Chinese coins in the product are the same as those in the N-series, which can be matched with the previous props to perform more routines.

The surface of the coin is smooth and comfortable, with excellent hand feeling. The size is slightly smaller than a Morgan dollar, therefore easier and smoother to execute palm and other sleights

The coin and shells in this product can be used as a three in one set. The normal coin will nicely fit in the two 100% covered shells, making your table coin routines amazingly clean.

Instruction includes 5 routines:

- super 3fly
- super 3 cross
- coins through table
- matrix
- flash matrix

Those classics of magic will be more pure and magical with the use of three in one set.

This set also has strong scalability. It can be used in different effects and routines.

The product includes four ancient Chinese coins, a shell, an expanded shell and detailed online instructions.

Don't wait! Add mysterious oriental power to your coin magic now!
