
Beach House Card Tricks (Vol 3) by Marc Davison - Buch

This is the third and final volume of the **Beach House Card Tricks** collections, just off the press.

Another amazing collection of over 100 tricks, card controls, and routines, mostly of contemporary material with much of it from YouTube performances and tutorials. This collection contains many of the classics, and is the result of screening many, many hundreds of tricks for those with super effects.

This volume is different from the first two in that many of the tricks require some sleight of hand; however, I purposely avoided tricks with the more complex sleights. My intent still remains to create entertainment value and not to create card magicians. This book is probably best suited for someone who has some knowledge of card handling, but there are still plenty of tricks well suited to the casual card trickster. The format and content sections are similar to the first two books, but I have included a section specifically on 4-Ace tricks. There is also a section on tricks using double backed cards and card crimps.

This is a high-quality book that matches the others - 6 x 9 inches hardback, color photos, black cloth cover, sewn binding, shrink wrapped, 200 pages.

This collection will not disappoint! This is a very limited printing and when they are gone, they are gone.

If you already have Volumes I and II, you will definitely want to have one of these to make the set complete.
