## **FREEDOM OF EXPRESSION by Dani DaOrtiz - BOOK - Buch**

Without a doubt, this is Dani DaOrtiz's most representative book. And now it is available for the first time in English. Its first edition, published in Spanish in 2009, surprised all card magic lovers, due to Dani's philosophy that "Everything happens from the point of view of the audience" (as we have heard the author say so many times).

This is a book that perfectly describes Dani's concepts, which many magicians have used to improve their perception of psychological forcing.

Through almost 180 pages of information, Dani undresses artistically and mentally, offering all his psychological weapons and placing them within everyone's reach.

Strategies, subtleties, psychological techniques...

Force numbers, cards (without using a deck), situations, decisions...

Study on classical (psychological) forcing

The psychology of the seventh card

Working with small groups

Verbal and numerical forces

Magician's Choice

Deception by visual perception

Dealing with mistakes and outs

Fishing and subtleties

Tricks right out of Dani's repertoire

### **Think of a number...**

Force numbers, cards, colors, choices.

Get into the spectator's brain and handle it as you please.

Dani will not only teach you how, but he will offer you an arsenal of techniques and tricks so that you can rehearse it.

Spectators will, without knowing it, be freely forced.

Welcome to Dani's world!
