
Kranzilla Unleashed by Nathan Kranzo - Buch

Clever, quirky, original, commercial, funny, different, practical - these are just some of the words that you can use to describe the magic of Nathan Kranzo.

In this collection of his ideas for stand up and close up, you will find magic to suit a wide spectrum of tastes and audience types. With effects ranging from visibly sliding a tan line up your arm, right through to enabling a spectator to cut to the four Aces, Nathan combines raw cunning with extensive magical knowledge to produce magic that is always interesting and usually totally baffling.

And running through all the material is the Kranzo sense of humor which is at one moment subtle and mischievous, and the next raw and basic! He loves to have fun with his spectators and while much of the magic in this book includes his comedy presentations, Nathan also explains a number of great visual gags that you can place straight into your act.

Nathan's audiences love his memorable magic, and so will you!
