
Magicians Table by TCC

Classic Elegance with Stylish Design.

Integration of Ergonomics and Aesthetics.

This is the TCC PRESENTS Magician's Table.

Every professional magician, from The Mentalist to the Sleight of Hand Artist would have a need for a Magician's table. A Magician's table can be used as a side table during a stage or parlor performance, or as the main performance area for a closeup performance.

The commonly seen Magician's tables on the market have many advantages while simultaneously presenting many disadvantages as well. For example, in order to increase portability and disassembly, the sturdiness and weight of the table had to be reduced, compromising the durability and service life of the table, and greatly reducing the stability of the table.

Our newly designed Magician's Table is not only made from high-quality materials and can be disassembled for portability and storage, but is also sturdy and stable.

The TCC Presents Magician's Table will surely become a worthy accessory for any Magicians.

TCC Presents Magician's Table - Details and Features
