
Tiles - Pokerdeck

Story

The design of this deck is given by the intersection of colors and geometry. Each single square represents a tile with its own style that together represent a modern mosaic. I am a lover of shapes and colors, by combining these two worlds I was able to create the right balance between the two worlds.

Cards

- Premium paper stock - Crushed stock to unlock
- Air-cushion finish
- Traditionally cut
- Custom Design
- Printed by USPCC
- Limited Run

Faces

The pips represented in 3d are a reference to the real tiles, which inside them represent some of the tiles that are present in the back of the card. The set of 3d drawings give a sense of depth and almost an optical illusion to the beholder.

Back

The back of the deck represents the complete set of tiles that will be part of the following versions. The first note, will represent the complete set and subsequently the single motifs of the single tiles will be patterned in the following ones.

Tuck

The tuck has a minimal design that is composed of a composition of tiles that recall the back of the deck.

Extra Cards

This deck encloses 4 extra-cards:

- 2 identical Joker
- 1 custom card
- 1 Double back card
