## **Harlequin Cigarette Holder by Quique Marduk**

A really nice cigarette effect that can be used in a cigarette routine as impromptu or like a magic gag.

The famous effect popularized by the great Cardini.

Good for magicians, clowns, jugglers or comedians.

You don't need to smoke nor lit the cigarette.

A black cigarette holder is introduced. The performer reaches in the air and catches a cigarette; it is pushed into the ear and appears in the holder!

Now the cigarette is removed from holder and placed in a handkerchief. Handkerchief is shaken out, the cigarette has vanished and re-appears in the holder!

You receive the special gimmicked cigarette holder, an extra fake cigarette and instructions.
