
Snakes and Ladders Deck by Mechanic Industries

Snakes & Ladders Playing Cards

Living up to our tagline 'Fixing Games Since 2012', we've re-imagined the game of Snakes & Ladders but in a Quantum Mechanics kind of way! Twinned serpents create a snaking ladder using our trademark 13 repeating back marking system. Riffle through the deck to activate the animation and give your spectators a truly magical moment... then hit them with the other surprise tricks.

Easy to read markings

Multiple ways to read the backs, very clear and easy to determine value at a quick glimpse. Full detailed instructions included in the tutorial that accompanies this deck.

Custom Faces

All aces, not just the ace of spades have custom snake illustrations incorporated into the design. The typical red color of the hearts and diamonds has been replaced with a golden yellow to match the rest of the deck. The royals in the courts have visual snake elements.

Snakebite Gaff

A really surprising moment when a snake shoots out of the deck in an instant and steals the corner of the spectators card. Use the flip-book animation to set them up then strike them with this for shocking reactions!

Snake Reveal Jokers

A super creative and fun way to reveal a spectators card. Inventive design uses the snake to reveal a force card of the 8 of diamonds! Use any color change to activate the transformation and change the snake into the spectators 'freely' chosen card! This is a great little trick in itself but can be combined with the Snakebite Gaff and other features in the deck to create a full Snakes & Ladders routine.

Magic Tutorials

Boundary pushing magic with full video tutorial support. We teach you how to read the markings and give you multiple routines using the Snakebite and Joker reveal gaffs to get you started!
