SILK CAN COKE by Marcos Cruz

Transform a can into patterned silk... show the public a can of soda, place it inside a tube where it shows that it is in the inside the tube, it gives a magical click and the can has disappeared, transforming into silk stamped with the soda can.

Not only can you use it to make the can disappear, in the instructional video we show you other routines you can use

For the presentations of your children, stage and others, what do you hope to have yours.

SILK CAN is compatible with ORIGAMI CAN, you can put together a different routine for your audience.

SILK CAN is an idea by Marcos Cruz.
