## **FAST FINGERS by Hugo Valenzuela**

If you are looking for a trick that breaks with conventional tricks, you have already found it!

This is about a bet... You will ask a woman or man for a phone number or a supposed bank code.

This will be shown by covering part of it to protect the data and will request to cut part of the number to be placed in the bear trap.

Then you will propose to bet one bill.

If you are caught by the trap you will lose this.

If not, you will win the number.

By your **Fast Fingers** the magician with a single touch will travel the number to his wallet or into a marker that the spectator could have held in his hands! In this way an unexpected surprise will come true in the minds of the viewers.

You can wear **Fast Fingers** on your keychain or as a necklace.

People will be intrigued about what that is and it will be the perfect way to start the trick.

**Fast Fingers** adapts to different styles of magic and is easy to do!
