## **ANIMATED CIGARETTE by John Kennedy**

A cigarette slowly floats out of its pack and up to your mouth. Suddenly the pack changes into a box of matches.

The drawer slides open by itself and a match float out, strikes itself, then floats up and lights the cigarette! You don't need to be a smoker to perform the **Animated Cigarette** because no tobacco smoke is used - none!

The **Animated Cigarette** does not use any thread or body hook-ups either. You do need practice to master the handling, and you need to wear a shirt or coat with a dark pattern to hide the gimmick during your performance.

**Animated Cigarette** comes with detailed instructions including video. Enjoy!
