
Moment X - Pokerdeck

Everything you see on the back, the courts, and on several of the pips, are actually photographs and film that was manipulated in post-production after the founder of **Moment X** cards spent an afternoon in a graffiti tunnel in Sydney, Australia, taking photographs and videos of himself doing cardistry and some (legal) graffiti.

Nobody can recreate these moments in time as they only occurred at those specific moments in time, never to occur like that again.

This deck is printed with the USPCC and features a custom Ace of Spades, Jokers, court cards, several number cards and pips, includes a double backed card for magicians and magic routines, and has the added bonus of being able to change color under blue lights!
