
Paisley Poker Red by Dutch Card House Company - Pokerdeck

Paisley Playing Cards are back, and this time in a vibrant colorway and WITHOUT the marking system. **Paisley Poker Edition Playing Cards** are perfect for family game nights.

The decks are printed by Cartamundi on their True Linen B9 finish Slim-Line Board.

For the Poker Blue edition, the team chose a dark Imperial Blue as the main color of the deck and tuck. The paisley design has been designed with gold, yellow, orange, and teal shades.

For the Poker Red edition, the dominant color is Velvet Red combined with yellow, gold, blue, and orange shades

Inside, the court cards and numbered cards maintain their traditional look to make them recognizable for every card and tabletop game. They all have been updated with some Paisley details with the respective deck's color scheme. This means the court cards of the blue deck are slightly different than the courts in the red edition. This ensures that each deck is unique.

The tuck has the same recognizable style as all other Paisley editions. The big Paisley logo placed on the front and the Paisley's name suited on the side. This means it has a nice consistency on your shelf when displaying all paisley editions together.
