## Oil and Water Boxes by Henry Evans

The effect starts when the magician shows six boxes, three standard red boxes and three standard blue ones, these ones get intercalated one by one per color, getting magically separated by colors with just a simple movement.

The magician is instantly able to show each one of the boxes.

The conditions of this effect are desirable; the boxes can be shown from every angle before and after the effect.

No techniques are required for its performance, nor even any special knowledge.

Bonus effect included:

It also includes an extra effect, where the magician asks a spectator to choose a number (free choice) between one and six, to select one of the boxes.

The non-selected ones are shown completely empty to the audience, and the only box that contains a deck, is the one chosen by the spectator.

This extra effect, allows the magician to start their performance with a clean scene and a new deck, making this product a good opener for those who enjoy doing card magic!

I'm sure magicians will like to work with it, it has an easy handling. This effect is perfectly performable in close up magic and also so visual for social media.

The product includes three standard red boxes and three standard blue boxes with their respective gimmicks, two specially sized rubber bands to boost the handling of the boxes, high quality performance video and explanation in QR format.
