**Bigblindmedia presents Lightwave ESP by Adam Cooper (BBM340)**

*"This takes ESP Decks to another level."*

**- Real Magic Reviews**

An ESP Deck that lets you divine a card's colour, symbol, image AND word in just a **GLANCE!**

The Lightwave ESP Deck is a brand new version of the best selling Darkwave ESP Deck released in 2020 by Bigblindmedia. Completely redesigned with a less extreme style, this brighter iteration of the deck looks both modern and versatile, meaning it can be employed in all kinds of performing environments.

Like the Darkwave, the Lightwave ESP Deck uses Adam Cooper's ingenious system with each ESP Card featuring **THREE** bits of information - an ESP symbol, a word and an image! And hidden away (in plain sight) on the back of each card is a brilliantly camouflaged marking system. This will allow you, in a fraction of a second, to divine both the symbol printed on the card and it's colour. But that's only the beginning... armed with this knowledge you can then employ Adam's devious secondary system to go on to reveal both the word **AND** the picture. Each phase is more impossible than the last, and it's all made possible with one quick glance.

These extra features allow for a huge amount of effect to be wrung from just a single selection. This is an entire act squeezed into one special deck.

What's more, this is **EASY TO DO!** Adam's innovative design means that you **DON'T EVEN NEED** to memorize anything - everything is printed on the card box. And it can be left in plain view - hidden in plain sight! The deck really does the majority of the work for you!

- Each card features an ESP symbol, a word, an image & a colour
- No sleight of hand required
- Super easy to use marking system - invisible to them, crystal clear to you
- No difficult memory work - everything you need is printed on the card case

- 
- Divine a card's colour, symbol, image AND word in just a GLANCE!
  - Goes so much further than other ESP Decks
  - Combine it with The Darkwave ESP Deck for even more routines!!!  
(There is an extra marking on the back of the Lightwave cards that allows you identify which pack it came from!)

The Lightwave ESP Kit includes:
