## Cardistry Fanning (RED) - Pokerdeck

**Cardistry Fanning Playing Cards** is one of the most outstanding playing cards. Just as its name implies, this deck it can be used to enhance the wonder of card tricks -- especially while fanning. It is also a functional deck of playing cards.

About the design:

usp

The design appears to be simple, yet has deep implications. Each back has a special six-pointed star comprised of lines. Every star is composed of white, blue, and gray to add strong visuals when you are fanning.

The highlight of the design is that different fanning directions will have different visual results (e.g., blue and white arrows in one hand, gray and black arrows in the other). This is just like in life -- a tiny choice will affect different directions that our lives will take. We believe that owning and using this deck will be a wise choice in your life!

Your shows will be visually stunning and will have more impact than using only a regular deck of cards. Powerful in its simplicity and unparalleled in its design, **Cardistry Fanning Playing Cards** open an essential key to unlocking your higher level of cardistry.

**Cardistry Fanning Playing Cards** utilizes new features while maintaining its integrity. Classic with a modern twist. The custom pips on this deck make fanning and flourishing even more incredible to view.
