- **Dani DaOrtiz**

Adrian Vega has created miracles for magicians everywhere, and now you could learn not one, but TWO of his most practical and commercial effects, directly from his working repertoire.

The definite CAAN effect with a normal deck of card, with NO duplicates, and as direct as you see in the video. A spectator will think any number and will count directly from the deck, with NO switches and the prediction card in full view from the beginning... just the perfect CAAN effect.

Also, if you don't have any deck with you, you gonna learn, as a plus, one miracle just with ONE folded card, where the spectator will imagine the value and the suit to create in his mind only one card... that will be exactly the folded card!

Again, NO switches, NO "weird" moves, just one card and his imagination.

This is a complete project full of psychology, direct magic, and natural handlings.

Something more important than just one more trick. Directly from the Spanish Magic School, Adrian Vega will share with you professional magic for real magicians.
