## **FORCED FOCUS RED by Richard Pinner**

### Richard Pinner's **Forced Focus**

You choose what they see!

**Forced Focus** gives you the ability to force one or several cards in a very clean and fair way, without the participants touching the cards.

The ingenious principle means the spectators cannot see any values other than the cards being forced, yet gives the impression a complete deck of cards is being shown.

This clever idea creates new possibilities for classic plots such as Tossed Out Deck and Multiple Card Revelations and opens them up to the virtual world.

It is ideal for virtual shows but also in a live environment.

*"I really like it. If you want to do a mind reading routine online with a deck of cards this is the way to go."*

- **Luca Volpe**

*"Forced Focus is fantastic. What Richard has created is not just a trick, it is a fully fledged utility prop."*

- **Katherine Rhodes**

*"The possibilities are endless. I got really excited when I first saw Forced Focus. I can't wait to get my hands on one."*

- **Marc Oberon**
