## **Bamboozlers by Diamond Jim Tyler - Pokerdeck**

This beautiful design was a collaboration between Diamond Jim Tyler and Phill Smith (who designed the very popular Diamond Marked Playing Cards). The artwork of Benjamin Vincent has returned on the face of each card as well. The tuck box exudes quality with the gold foil art printed on the lush textured blue stock. The flowery back design features lots of hidden imagery depicting items used for bar tricks.

The best part is the 52 various bar bets or challenges on the face of each card. Each card features a different conundrum with items found in most homes or restaurants/bars. If you know sleight of hand or card tricks then you'll love the finish and card stock for your manipulation. If you're not a card shark then you can still entertain folks with the various puzzles and challenges. Bartenders could easily use this deck to keep patrons at the bar longer and increase their tips.

Regardless, you'll be the life of the party with this deck.
