## **Beach House Card Tricks (Vol 1) by Marc Davison - Buch**

Beach House Card Tricks (Volume I) by R. Marc Davison, published in the US by Class LLC, Pawleys Island, SC 2020 - (printed in Canada) ISBN 978-1-950768-54-7

This latest book out on card tricks is a collection from among the best classic impromptu, mostly self-working card tricks. It is not your average card trick book full of cheesy, simple dime store card tricks. It contains over 100 tricks plus variants, and with color photos where needed for clarity. A lot of research (more than 2,500 tricks reviewed) has been devoted to compiling this collection of some of the best impromptu tricks, with great effects, that can be done by most anyone with any deck. Some require a simple setup, but no complex sleights or heavy memorization is required. Instead of reading many card trick books to glean a nugget or two fitting these criteria, this collection is made up of the nuggets from many sources, many of them vintage. Every beach house or vacation house needs one of these books for the evenings and rainy days when someone pulls out the cards. This collection will not disappoint!
