## **Invisible Lie Detector by Wayne Dobson & Alan Wong**

The Invisible Lie Detector is the latest in Wayne Dobson's output of quick, powerful, simple close-up mental routines.

- Eight cards bearing the names of everyday objects.
- One is freely chosen under the fairest conditions
- Byplay involving an 'Invisible lie Detector' and the spectator lying about his or her chosen object to try and put you off the scent.
- The performer has the matching object in his closed hand
- Super-simple and a lot of fun to perform
- Each time the choice can be of a different object
- Uses everyday objects and they are included
- Resets in an instant

Provided with everything you need to perform it, straight out of the box!

Puts a smile on your face every time you perform it: Wayne's method is every bit as good as the effect!
