
Rocket Book by Scott Green

Scott Green's "**Rocket Book**" takes two classic ideas and combines them into an innovative new prop that is sure to delight audiences of all ages. Working like a unique blend of the Magic Coloring Book and Topsy-Turvy Bottle, this fun and surprising effect is sure to be the highlight of any live or virtual magic show.

"**Rocket Book**" begins by showing the book as normal, with all the pages facing the right way. Then, despite turning the book upside down or sideways, the pictures impossibly remain right side up. This is strong enough as is, and the kids will be losing their minds already. However, everyone in the audience is bound to go crazy once you're able to then make all the images magically flip upside down.

Be sure to watch the demo video to see "**Rocket Book**" in action and the reactions it can elicit!

This exceptional quality book is approximately 12in x 12in and features vibrant and fun illustrations printed on thick stock that can be easily seen by even large audiences. It's super easy to use and comes ready to go out of the box. You'll be able to perform it within minutes of opening it.

The online instructions feature a complete routine, as well as Scott's signature routine featuring a kicker ending with the Topsy-Turvy bottle. While a Topsy-Turvy bottle is not required to perform the "**Rocket Book**" effect, it's highly recommended for anyone looking to take this amazing effect to the next level.

Includes specially gimmicked book and video instructions.
