
Silicone Ear by Alan Wong

This is a great sight gag, ice breaker and a great tool for misdirection. A pure soft silicone ear of prosthetic grade material with fine life-like details. This is not a plastic, vinyl, latex, foam or rubber toy ear that you can buy at the prank shop.

Every magician can produce a coin from behind someone's ear. Now you can produce an ear from the coin!

- Perform the finger through ear illusion with your real ear, with the silicone ear palmed in the same hand, then pretend to rip your ear off and put it back or leave it on the table.
- Vanish a silk into your ear then produce it from a third ear in your hand.
- Whisper a chosen card into your magic ear away from you and you find it for them.
- Have a play on words during your routine and say we'll play it by the ear. Produce the ear and provide yourself a practical moment for misdirection to do what you need to do.

One life size and life like silicone ear included. Prop only and no instructions.
