
Revolution - Pokerdeck

The **Revolution Deck** has no frame and the design reaches the edges in order to create spectacular drawings on extensions and fans.

Fans are an essential element in any deck, and even more if you are a Cardist. This is why we have worked hard on this aspect in every design of our OMEN cards.

The design of the back of Revolution continues in the faces in a wrap-around way, allowing the creation of fan figures and extensions with the faces as well. This design also enables to easily read the indexes.

The faces of our decks have been designed to adapt to modern times; their straight shapes allow a perfect understanding of the clubs and maintain a balance between the classic and modern.

Aces are very special cards for magicians, cardists and all kind of card lovers. Therefore we wanted to give them a the deserved protagonism. The four aces are bigger and the Ace of Spades contains a special highlight with a subtle stroke in the center, signature from the OMEN logo.

The box was designed to have a very special meaning in each deck. The back symbolizes the past, the front represents the future, and the present resides in the hands of the card holder itself, which symbolizes that we we are in control.
