## **Sleight Trainer (Steel Deck) by Hondo**

**Effect:** Pass Trainer can train your hands to be stronger. A normal deck will feel like a sponge after training. It makes doing the pass or other card sleight of hand easier.

**Includes:** 8 steel slabs

**Training:** Practice the pass or another card sleight of hand you like with the steel deck. Be careful not to hurt yourself or other people. Every time you train, just keep practicing for 15 to 30 minutes and then rest, not too long. Take a normal deck and it will feel like a 'sponge' deck, so light and so handle able.

**Other Thoughts:** It doesn't only train your hands but also can be used for magic routines such as Ambitious Card. I used to ask the spectator to sign on the steel face, and then perform Ambitious Card by doing pass, even double lift.
