
SKY CUBE (Gimmicks and online Instructions) by Julio Montoro

An effect created by Julio Montoro when he was 13 years old now sees the light. Introducing you, **Sky Cube**.

Sky cube is a three phase routine using a keyring Rubik's Cube.

Phase 1: The spectator mixes the cube and selects one colour. He/she gives it to you and... BOOM, the whole cube changes into that colour.

Phase 2: Take the cube and splash it into a 2d cube that fits perfectly in your pocket.

Phase 3: We all know it is hard to solve a Rubik's Cube, but imagine how difficult it would be to solve it in 2D. YOU CAN! Shake the cube and solve it! Now yes, put it in your pocket. IT FITS PERFECTLY.

You will get all the gimmicks already constructed. The only thing you have to do is stick the stickers and you will be ready to go.

We have included a bonus effect where you can solve the mini cube in a really visual and cool way. YOU WILL LOVE IT.

WELCOME TO **SKYCUBE BY JULIO MONTORO**.

Note: we've contacted "Magic Action" for his "Hypercube" effect. They've given us FULL permission to put our version out as Julio's one was created 7 years ago. Thanks so much to Magic Action!
