## Fluid Art Blue (Cardistry Edition) - Pokerdeck

This project is specially dedicated to all cardists, flourishers, and collectors.

There are two meanings behind the 'Fluid Art' . In English, the name embodies the flow and design which draws inspiration from fluid paintings. In Chinese means glittering and brilliant colors of light. We believe that this would cause your eyes to sparkle, not just figuratively, but also in reality.

In addition, we are also adhering to our pursuit of superb feel and handling. Using a brand-new process, that no matter the type of flourish and cardistry moves, the tactile feel and slickness of the cards all blend smoothly into one fluid motion.

The Standard edition and Cardistry edition share the same vibe and color scheme, however, that is where the similarities end. The tuck cases, back design, and card faces are different.

This sincerity of design has developed into two different unique aesthetics. One way to distinguish between them is by the patterns on the front of the tuck box. The front of the Standard edition depicts the four playing card pips, and the Cardistry edition depicts four squares.

### Cardistry Edition

The Cardistry edition does not have pips on the faces, instead, it is replaced by a unified pattern.

The vortex-shaped spiraling center coupled with the two-toned corners creates a beautiful belt pattern when the cards are fanned, and elevates the coolness factor to its fullest. Exposing the dynamic beauty of your cardistry flourishes.

With neat and uniform card faces, these delicate details were specially tailored with the cardists in mind. The **Fluid Art Playing Cards** Cardistry edition can be described as: Trendy.
