
My Poker Collection by Martin Braessas

"Finally a packet trick that makes sense. It's easy, practical, and visual. I rarely perform a packet trick but this is an exception!"

- **Patrick Kun**

From The Mind of Martin Braessas comes **My Poker Collection** . You show a packet of five 10 of spades and magically one by one start to turn face down. Each card has a different back. But that's not all... when you show them again now they changed into a Royal Flush!

You receive a set of custom designed cards to perform this effect plus a gimmicked card that does the hard work for you.

You can use your own cards if you prefer so. The gimmick will work with any back designed cards you have.

You can use a table or spectator's hands, you can do it live, for your virtual shows or upload it to social media!

Perfect for walkaround, close up and street magic

In the tutorial you will find different handlings and routines. Also you will learn all the details to perform this effect and the theory behind it that makes it so powerful.
