ULTRA BUD by SYOUMA

This is the Ultra Coke series "Ultra Bud"

The crushed can returns in an instant in front of the other party! A practical and perfect revival/appearance bud can made of special materials! It is an original item of the magic shop.

The revival phenomenon can be repeated, and it is easy to make it unopened, although resetting work is required. It has strong durability and is highly practical. Anyone can easily do it, and the visuals are good and easy at any time. It only looks like a real can. You can also open the can and pour the contents into the cup. It can be applied to various other phenomena ? Can be used many times. I will recommend it with confidence.

If you want to play in the unopened state after opening the unopened pull top, you need to reset it, but it is easy to do. The commentary will be an online video.
