An impossible change, right under their eyes

With **Picture** you can clearly show a card to your spectators, fold it and place it at your fingertips to instantly unfold it and show that the card has changed. WTF?

A card can change to another, a blank card can become printed... the possibilities are endless and not only applicable to cards!

Imagine showing a card to a spectator, just before putting it folded in his pocket. When you desire, just ask him to take it out and open it... the card has changed.

French Kiss variation

Having **Picture** on you allow you to perform a variation of the famous French Kiss trick (popularized by Wayne Houchin) where you can show the card to your spectator just before putting in between her teeth, hands empty. Can you find a better convincer?
