## **Rose Light set RED by JL Magic**

This is one of the most beautiful visuals you could place in your show...

### **EFFECT:**

You take a rose from its vase, hold it up and smell it. Then, you reach out and pluck out a light from thin air. Magically, you toss the light from your hand and into the rose! The rose is now glowing and creates a beautiful display. The light can be "plucked" from the rose and back into your hand. It is 100% under your control at all times.

This wonderful, visual piece of magic is great for storytellers, kids show performers and silent acts.

Self-contained & self-working!

**Note:** the rose color is pink.
