
Split Focus Eisenhower by Greg Wilson

THE PERFECT WEAPON FOR EVERYDAY CARRY

Split Focus is a visually striking coin routine that looks like a Hollywood special effect, where three silver dollars appear and disappear over and over and over.

To look this good, it should take 10 years of arduous practice - unless you have the precision-made gimmicks, which do all of the hard work for you. In fact, the most difficult move is a simple false transfer!

Split Focus comes with everything you need to assault the senses of any audience at a moment's notice:

- Three gorgeously handcrafted gimmicked coins
- Online instructions for both two and three coin routines
- The secret "retrieving/ditching device" to start and end perfectly clean

Also included is an arsenal of 12 original routines by Gregory Wilson and additional ideas by David Gripenwaldt and Justin Miller.

Choose between Eisenhower or premium-replica Morgan Silver Dollars to become a combat-ready triple threat.
