
Skymember Presents The Vanishing Band by Romnick Tan Bathan

There is a saying that simplicity hits the hardest. **Vanishing Band** is exactly that. We are honoured to have **Romnick Tan** all the way from the **Philippines** to share with us the brilliant concept behind this project.

You start the presentation by taking out a single rubber band and stretching it out. Without any cover, you would **magically vanish** a single rubber band into thin air. No words can describe how magical this moment is. Once the rubber band was gone, it is entirely under your control where you want the rubber band to reappear.

It is **Extremely Visual, Easy to Do** and **Versatile**. Your audience won't have a clue! You don't need to wear extra rubber bands on your wrist! Both hands never come apart as the magic happens. Not to mention, it is resettable in just 1 second.

No details were compromised. Taught by **Zach Ng** and **Calvin Liew** in Chinese dub and English subtitled. They teach everything that you need to know to perform **Vanishing Band** in real life situation as well on the social media platform.

Besides, you can utilise the **Vanishing Band** concept to perform arguably the world's first shrinking and splitting rubber band effect.

With your purchase, you'll receive **1 high-quality customised gimmick set** along with several **Joe's Rubber Band** to get you started in no time.

Get yours now and explore the beauty in the world of rubber band magic.
Available Now Worldwide.

Disclaimer: We want to express our gratitude to our former artist Dr. Cyril Thomas (creator of Psychobands) for creating the world's first single rubber band vanish, inspiring the new generation of magic creators.
