
Magic Tweezers 2021 by Tenyo Magic

Pluck large coins from a tiny hole!

MAGIC TWEEZERS

A pair of magic tweezers produces coins too large to fit through a tiny hole in a credit card. Is it amazing? Yes. It's also visually absurd, and will cause laughs of surprise each time a new coin appears. One of Spain's top magicians, Mario Lopez created this novel effect, and Tenyo has developed it in our own unique way to produce a new trick that is sure to baffle.

1. Show a pair of tweezers and a credit card containing a tiny hole.
2. Insert the tip of the tweezers into the hole... when you remove the tweezers, a large silver coin appears!
3. Show both sides of the card - there is nothing to see. Yet, you proceed to produce more and more coins!
4. Finally, wave the card over one of the coins, and it magically transforms into a dollar bill!
