
In the Visible Deck RED (Gimmicks and Online Instruction by Victory Hwan)

The audience names any card.

No Force, no magicians choice, the card is selected with complete freedom.

There is a deck that the magician has never touched.

This deck was seen by the audience from the beginning, and even they were holding.

When you open the card box and spread it, there's only one card with face down.

The card is the very card that the audience said.

What's more surprising is that you can turn over the rest of the cards and show them all on the back side.

In the Visible Deck is a personal deck that Victory Hwan has been using for years.

Super natural handling is possible.

You don't have to be stuttering, buffering halfway.

It can be done very fluently.

This great system eliminates all doubt.

The decks in the trailer video were filmed in the real **In the Visible Deck**.

You can do it just like in the video, even more naturally.

Handling is easy, simple, and very neat.

Use **In the Visible Deck** for your performance. Ideal for opening, in the middle of the show or finale anytime.

You just need this one deck! Because the audience is free to choose cards in their mind.

Therefore, it is also good to show lightly on the street. It will look good in any situation.

All decks are provided after Victory Hwan has tested them himself.
