
Fusion Coins Quarter by Dr. Michael Rubinstein

Routines with impossible objects as their surprise ending always over-perform. This is one of Michael Rubinstein's favorites.

The basic routine features you handing two coins to your friends for examination (a Quarter and a Penny) as you explain the different metals they are made of.

You then place the Penny on top of the Quarter and after a little squeeze the penny sinks into the quarter and is fused inside. The odd new coin can then be examined.

You pick up the coin, give it a little shake and the penny falls out leaving everything examinable and ordinary.

Also includes some quickies by Meir Yedid using the coins.

Comes with a gaffed quarter, and access to an online video tutorial by Dr. Michael Rubinstein and Meir Yedid. You supply the matching regular coins. Manufactured by Meir Yedid Magic.
