# The Dark Side Of The Cube - Revelations by Diego Voltini - Buch

"**The Dark Side of the Cube - Revelations**" is the second and last volume of The Dark Side of the Cube project.

In 2018 Diego Voltini introduced a Rubik's cube stack, which was defined by many as a game changer in Rubik's cube magic. The stack allows you to blind solve any face matching a color that is freely called out by a spectator. The stack, combined with the Rolling Solve technique, not only gives you the ability to solve the face without looking at the cube but also without the audience even realizing you are turning the faces.

In "**The Dark Side of the Cube - Revelations**" you will be provided with 12 scripted routines which will allow you to unleash the full potential of The Dark Side of the Cube concept combined with new techniques which can be used with both regular cubes and mini cubes and don't require any painful memory work or finger-angling moves.

It is highly recommended that you own "The Dark Side of the Cube" book since many routines contained in this new publication require techniques explained in the previous volume.

## CONTENTS

**INSTANT BAG SOLVE:** A bag solve where your hands ALWAYS stay in full sight.

**CUBIE SOLVE:** One face of a mini cube solves by itself by squeezing the cube in your hand.

**IMPROMPTU STACKING:** You blind solve the face matching a color freely selected by a spectator on a borrowed cube.

**THE COLOR IN YOUR EYES:** A color freely selected by a spectator is amazingly divined by another participant.

**KUB:** A mental routine full of comedy bits sponsored by the best-known Swedish furnishings brand in the world.

---

CUBOX: A stage routine where Rubik's cube meets Tic-Tac-Toe for a mind-blowing show stopper.

ROTATIONS: Techniques to hide a solved face while rotating the cube in your hands.

... AND MUCH MORE. The book also contains the Fortune Folding Force, a clever device to force ANYTHING on a spectator disguised by an innocent fortune telling game.
