
Curious Impuzzibilities by Jim Steinmeyer - Buch

Number eight, published in June 2020, features The Blunt Force, in which the spectator seems to predict your phone number, and the Excessive Force, a variation on the famous Nine Card Problem, in which the spectator perfectly arranges a packet of cards.

In addition, The "I Forgot of Something," is an incredible interactive trick, perfect for one person or a thousand people. The Instructions What Make it Work and The Poem What Reads Your Mind are two ingenious mental routines, arranged to read the thoughts of spectators with almost nothing at all (or, in the case of the poem, with absolutely nothing!) eleven effects, 34 pages.
