
Coins Akira's - Evolution For 25 Years by Akira Fujii - DVD

It's been 25 years since Akira Fujii became a professional magician with the release of his first lecture notes.

To commemorate this, we reshot a collection of his coin routines, "**Coins AKIRA's**".

The DVD of the same name was released in 2006.

But, at that time Akira was still performing for magicians, so the content was rather a contest like routine.

It was a rhythmic routine, but there were parts of it that were difficult for the general public to follow because of the number of strange things that happened one after another, and there were also parts where the effect themselves were too much.

In this DVD, you'll also learn how Akira has changed his routine, as he has mostly performed for the general public.

Content:

The entire routine is NO-GIMMICK, NO-EXTRA, and is seamlessly connected by reducing the number of coins one by one.

"Square": The no-extra chink-a-chink.

"Flash Back": The backfire assembly.

"Jet Coins": Akira Fujii's synonymous Coin Across.

"Ghost Sound": Ten-counting trick.

"Hide and Seek": One coin routine with a jumbo coin that do not require a vest or holder.

Only four regular coins, a card, and one jumbo coin are used.

In addition, Akira gives a detailed explanation of his original method of fake pas based on his original theory that gives the illusion of a flying coin, as well as his original wipe clean methodology.

Bonus:

The Retention Vanish with the Muscle Pass.
